

Imagine... an end to your nursing workforce challenges with a virtual nursing care model designed for you.

Our hybrid nursing model complements your in-hospital teams, **within your operational budget**, wherever your need is the greatest.

Our Solution

Admissions

Let your ally save your team hours by performing the bulk of the admission duties.

Patient Education

An educated patient is an engaged patient. We will ensure patients are comfortable with their plan and all questions are answered.

Discharge Planning

Let us coordinate the complex discharge process and ensure that the patient is successfully released from the hospital.

Patient Observation

Let us help ensure your patients are safe, who are fall or behavioral risk, providing that extra set of eyes. We are there to provide peace of mind.

Rounding

Your ally is a key participant during the healing process, ensuring accurate documentation, consistent messaging and routinely checking in with the patient and family.

Workforce Stabilization

Let us be there when you cannot. Let our experienced allies be a resource to your staff, and help with patient satisfaction to ensure everyone's needs are being met.

Your Results

Overtime	↓	50%
Sitter Cost	↓	75%
Contract Labor	↓	20%
Turnover	↓	30%
Falls/Falls Injury	↓	50%
HCAHPS Scores	↑	25%
Length of Stay	↓	.2 Days
